How Capable is your Organization?

According to McKinsey & Company, capability is: **“anything an organization does well that drives meaningful business results.”** All organizations have capabilities. What many don’t have is a process by which they can measure their different capabilities against best practices and pinpoint which ones are driving higher performance.

Don’t have standard processes, process assets, and job aids.

Cite difficulties in monitoring plans and making adjustments when needed.

Do not measure what matters.
